LESSON 1 EXPLORING ACCESS 2007	2	LESSON 2 USING AN ACCESS DATABASE	24
<hr/>		<hr/>	
Defining Access Databases	3	Adding Records and Formatting	
What Is a Database?	3	Datasheet Layout	25
Database Structures	3	Adding Records Using a Table	25
Storing Your Exercise Files	4	Formatting a Table Datasheet Layout	26
Exploring the Access Environment	5	Adding Records Using a Form	29
Launching Access 2007	5	Retrieving Data	30
Identifying Elements of the Access Window	6	Sorting Records	30
Opening a Database and Identifying		Sorting Records Using Multiple Fields	32
Features of the Database Window	6	Locating and Deleting Records Using Table	
Enabling Macros Controlling		Datasheets	34
Database Security	6	Using Forms to Locate and Edit Records	35
Identifying Features of the Database		Using Find and Replace to Update Records	36
Window	9	Filtering Records	37
Using the Navigation Pane	9	Previewing and Printing Data	43
Opening, Navigating, and Closing		Setting Up Data to Print	43
Database Objects	12	Examining the Preview Window	43
Working with Tables	14	Saving a Database as a New File	47
Viewing Forms	15	Using the Save As Command	47
Viewing Reports	18	Concepts Review	50
Glimpsing the Power of Queries	20		
Closing a Database and Exiting Access	22	LESSON 3 BUILDING A DATABASE	52
Concepts Review	23	<hr/>	
		Designing a Database	53
		Planning a Database Design	53
		Documenting a Database Design	53
		Creating a Blank Database	54
		Creating Database Objects	55
		Creating Tables in Datasheet View	56
		Creating and Using Forms	57
		Creating and Generating Reports	61
		Creating a Query	62
		Creating a Table from an Excel Worksheet	66
		Creating a New Database Using a Template	68
		Concepts Review	70

LESSON 4 MANAGING A DATABASE **72**

Creating Tables Using Table Design View	73
Displaying Table Design View	73
Entering Field Names	73
Identifying Field Data Types	74
Entering Descriptions	74
Setting Field Properties	74
Identifying a Primary Key	74
Appending Records to a Database Table	76
Creating and Testing Queries	78
Query Defined	78
Creating a Query Using Query Design	78
Adding Criteria to a Query	81
Creating Forms and Reports Using Wizards	84
Creating Forms Using the Form Wizard	84
Creating Reports Using the Report Wizard	87
Managing Databases and Database Objects	89
Saving Database Objects as New Objects	89
Backing Up a Database	91
Compacting and Repairing a Database	92
Concepts Review	93

LESSON 5 MAINTAINING AND DOCUMENTING A DATABASE **94**

Modifying Table Structures	95
Editing, Adding, and Deleting Table Fields	95
Assigning Primary Keys	97
Setting Lookup Fields Using the Lookup Wizard	99
Examining the Benefits of Lookup Tables	99
Performing a Lookup	99
Setting Field Properties	102
Why Set Field Properties?	102
Setting Field Size	102
Setting Captions	102
Formatting Data Using Input Masks	102
Setting Validation Rules	106
Setting Default Field Values	108
Analyzing and Documenting a Database	109
Reviewing Performance Results	109
Documenting a Database	109
Concepts Review	112
